

**Eye Clinic of Wisconsin, S.C.**  
Antigo, Wisconsin

FCM Corporation has done a number of projects for the Physicians at the Eye Clinic of Wisconsin. Once again, FCM Corporation was retained by the Eye Clinic to design and construct their new Ophthalmology Clinic in Antigo.

FCM Corporation negotiated and purchased the clinic site for the doctors. We planned the new clinic with the physicians and staff to ensure the new clinic will meet their current and future needs.

The building exterior includes brick veneer, a drive under canopy, and a standing seam metal roof. Key interior spaces include; six eye lanes, a treatment room used for laser procedures and an optical dispensary.
