

DAVIS DUEHR DEAN EYE CLINIC

Dean Health System
Sauk Prairie, Wisconsin

FCM Corporation was selected as the design/builder by St. Marys Dean Ventures to design and construct a 6,000 square foot eye clinic in Prairie du Sac, WI.

FCM Corporation assisted in the site selection, working with the staff at Davis Duehr Dean. We combined our experience and their needs to develop an efficient plan to meet the current and future needs of the practice. We followed the prairie style design, which is prominent in the Sauk Prairie area. This allowed the clinic to fit into the community.

The clinic space consists of six eye lanes, lab, optical dispensary, contact lens room, visual fields, treatment room, tech stations, offices and support areas.
