

**Verona Family Practice Clinic**  
U.W. Department of Family Medicine and Practice  
Verona, Wisconsin

FCM Corporation assisted the University of Wisconsin, Department of Family Medicine and Practice in the development of this 21,000 square foot primary care teaching clinic. FCM was responsible for programming a successful layout to ensure both an efficient workflow for seeing patients as well as providing the correct spaces for the faculty and residents within the patient care areas.

FCM was instrumental in assisting the Department of Family Medicine and Practice in selecting a quality site for developing this project. We worked closely with the staff and administration in implementing their criteria to develop this unique clinic.
